## REGULATORY APPROACHES TO REDUCE PARTICULATE MATTER EMISSIONS FROM

#### TRANSPORT REFRIGERATION UNITS

September 4, 2002

#### Overview

- Action to-date
- Background
- Summary of last TRU proposal
- New Approach/Concepts
- Regulatory development schedule
- Contacts

#### **Action To-Date**

- 5th TRU Workgroup meeting
  - Plus 4 Special TRU Electrification Workgroup meetings
- 3 Public Workshops
- Reviewed feedback
- Established Control Technology Matrix
- Provided draft TRU regulation language

3

# Action To-Date (cont'd)

- Completed surveys
  - ◆ Several with TRU manufacturers
  - ◆ Several with TRU engine manufacturers
  - ◆ Emission control system manufacturers
- Completed 18 site surveys
- Collected cost data for alternative technologies
  - ◆ (e.g. electric standby (E/S), cryogenic, CNG)
- Working on demos

### Background

- Mass emissions
  - ◆ Number of TRUs: 45,000 to 55,000
  - ◆ Total PM emissions
    - +>3 tons per day (>1100 tons per yr)
- Near source risk concerns
  - ◆ TRUs operating near residences
    - + Large numbers congregate: 1 to 500
    - + Hours of operation: 2 to 5000 hrs/week

Risk in potential cancers per million

### Last TRU Proposal Summary

#### ■ Key Elements

- ◆ TRU Manufacturers
  - + New TRUs to be equipped with electric standby (E/S)
- ◆ Fleet Owners/Operators Phased reqmnts
  - + Replace in-use TRUs with new TRUs equipped with E/S,
  - Retrofit in-use TRUs to reduce PM emissions by 75% or to less than 0.15 g/bhp-hr, or
  - ◆ Retrofit in-use TRUs with E/S
- ◆ Facility requirements
  - + Provide electric power infrastructure
  - ◆ Prohibit diesel TRU operations at facility, if E/S-equipped

# **Concerns Over Last Proposal**

- Infrastructure required
- Availability of retrofit technology
- Cost
- Long term investment decisions
- Multiple, successive regulatory impacts
  - ◆ On-road & offroad standards
  - ◆ HACCP regulations

9

# New Approach

- Focus on both near-source and mass reductions
- Performance-based approach to provide flexibility
- Make the long-term regulatory goal clear

# **Key Concepts**

#### ■ Engine Manufacturers

- Progressively more stringent TRU engine standards
- ◆ Examples
  - + 0.30 g/bhp-hr by 2005 or earlier
  - + 0.10 g/bhp-hr by 2010 or earlier
  - + 0.01 g/bhp-hr by 2015 or earlier

11

# Key Concepts (cont'd)

#### ■ TRU Owner/Operators

- Progressively more stringent in-use requirements
- ◆ Examples: Lower in-use emissions every 10 years by
  - → Retrofit
  - → Repower
  - + Replace

## Key Concepts (cont'd)

#### ■ TRU Manufacturers

- ◆ Provide options to customers
- ◆ Examples
  - + Cleaner engines
  - → Verified retrofit options
  - + E/S with more capacity
  - + Cryogenic systems
  - ◆ Alternative fueled TRU engines
  - ◆ Non-diesel-fueled TRU engines
  - + Advanced technology

13

# Key Concepts (cont'd)

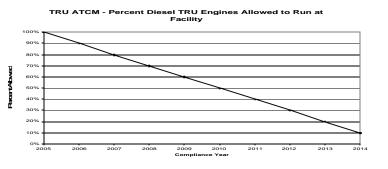

#### ■ Facilities

- Provide needed infrastructure in stepwise fashion
  - + Electric drive
  - ◆ Cryogenic temperature control
  - + Alternative fuels
  - ◆ Advanced technologies

# Key Concepts (cont'd)

#### ■ Example

 Allow decreasing numbers of diesel TRUs to operate while at facility

### Schedule

- Next Public Workshop: Mid-November
- Board Hearing: Mid-2003
- Comments via email by October 1, 2002

### Contacts
